

# Melanion Digital Appoints Charlene Fadirepo to Its Supervisory Board

PARIS, FRANCE – December 8, 2025

Melanion Digital today announced the appointment of **Charlene Fadirepo** to its **Supervisory Board**. Her expertise in **governance, regulatory strategy, and Bitcoin treasury considerations** will support Melanion Digital as the company continues to deepen its institutional-grade approach to **digital-asset investment**.

Charlene joins the firm at a key moment as Melanion Digital continues to consolidate its position as a **European reference in Bitcoin financial engineering**, with activities spanning proprietary Bitcoin strategies, professional-investor fund vehicles, and structured digital-asset solutions.

Earlier this year, **Sigma Management Lux** completed its registration under **Article 3(3)** of the **Luxembourg AIFM regime** (“sub-threshold AIFM”), allowing it to operate within the European AIFM framework and manage alternative investment fund vehicles for professional investors.

*“Charlene brings a rare combination of institutional governance experience, regulatory insight, and practical understanding of Bitcoin treasury implementation,”* said **Cyril Sabbagh**, **Founder of Melanion Digital** and former **Head of Equity Derivatives Trading at Oddo and Exane Derivatives**, as well as initiator of **Europe’s first UCITS Bitcoin-equities ETF**. *“Her expertise will help us further reinforce our governance, risk management and compliance frameworks as we continue building a robust, institutional-quality Bitcoin platform.”*

Melanion Digital’s leadership team also includes **Gian Luca Fetta**, **Head of Trading**, previously **Head of Global Derivatives Trading at Société Générale** and **FX Trading at Santander**. His background in crypto options and structured strategies supports the firm’s proprietary Bitcoin activities across derivatives and blockchain-native instruments, powered by in-house technology designed to optimise diversification and execution.

*“Melanion Digital has taken a thoughtful and structured approach to digital-asset strategies within a regulated European environment,”* said Fadirepo. *“I look forward to supporting the company as it strengthens its governance and helps institutions*

*understand how Bitcoin can be integrated responsibly through rigorous operational frameworks."*

Through this appointment, Melanion Digital reinforces its commitment to **robust governance, AML/CFT standards, operational discipline, and institutional transparency**—foundational elements of the firm’s long-term strategy.

---

## About Melanion Digital

Melanion Digital is a European pioneer in Bitcoin-focused financial innovation. Founded in 2021, the company is one of the earliest—if not the earliest—structures in Europe to have adopted Bitcoin as the reference asset of its corporate treasury, reflecting its long-standing conviction in Bitcoin’s structural role in modern financial architecture.

The firm operates across three institutional-grade business lines: proprietary Bitcoin exposure deployed through systematic market-neutral strategies; a Luxembourg-based asset-management subsidiary operating under the Article 3(3) AIFM regime; and a suite of structured digital-asset solutions, including scalable “synthetic mining” and white-label products for financial institutions.

## About Charlene Fadirepo

Charlene Fadirepo is the founder of Mango Digital Strategies, a consulting firm specialising in Bitcoin governance and treasury considerations. She previously served as a regulator at the U.S. Federal Reserve Board of Governors and as a management consultant at PwC. She holds an engineering degree and an MBA from Duke University.
